To Whom it May Concern.

I'm a Farmer. While I support a move to Electric Vehicles, I don't support a policy which taxes a vehicle I need for my business when there is no affordable fit for purpose alternative. I need a four wheel drive ute for my business. The only ute with no tax on it under the proposal is a two wheel drive ute. Sorry this is not safe to use on my farm. A key factor that hasn't been delivered by the industry yet is a sufficient battery range. When you live in the country you often travel long distances. The current vehicles don't deliver in that space yet. I look forward to some common sense and fairness being applied to this policy.

Regards,  
Grant McCallum.
