Hi Arndrea,
G'day.

Further to our meeting among stakeholders, we wish to share our views on the draft which is as under:

Cabchooze, is proud to be the 1st Taxi app to introduce Taxi APP concept in NZ is excited with reform- tilt towards technology in SPSV sector.

As the time goes, we together look forward in improving elements of safety (Drivers/passengers/road users) and appreciate points of concern raised by senior Police representative(s) present in the meeting, which we reproduce:

- a) Inbuilt camera are helpful
- b) Cash payment option –important as a choice
- c) Wheel chair service for disable be given a priority by providers

From the changes proposed it is presumed that in few option(s) a P endorsement qualified individual

- Can work under/for or represent more than one brand
- Can serve a passenger in a vehicle displaying Taxi brand ; and next minute can pick up a passenger on the same vehicle with no brand displayed.

General: Considering fatigue concern, we feel a creation of National Gateway/centralised eLogbook for all P drivers on road will assist in a long run. REALME may prove helpful in this digital Transformation.

Thanking you and your team once again,
With regards,
BK.Sharma & Arjun
